News

Dashboard is the initial window of the FOTA WEB page upon successful login. It includes various useful general information about the solution or your current devices' status. Starting from the **News** window, it is designed to keep users updated with the latest information about FOTA WEB such as system updates or newly added features and functionalities.

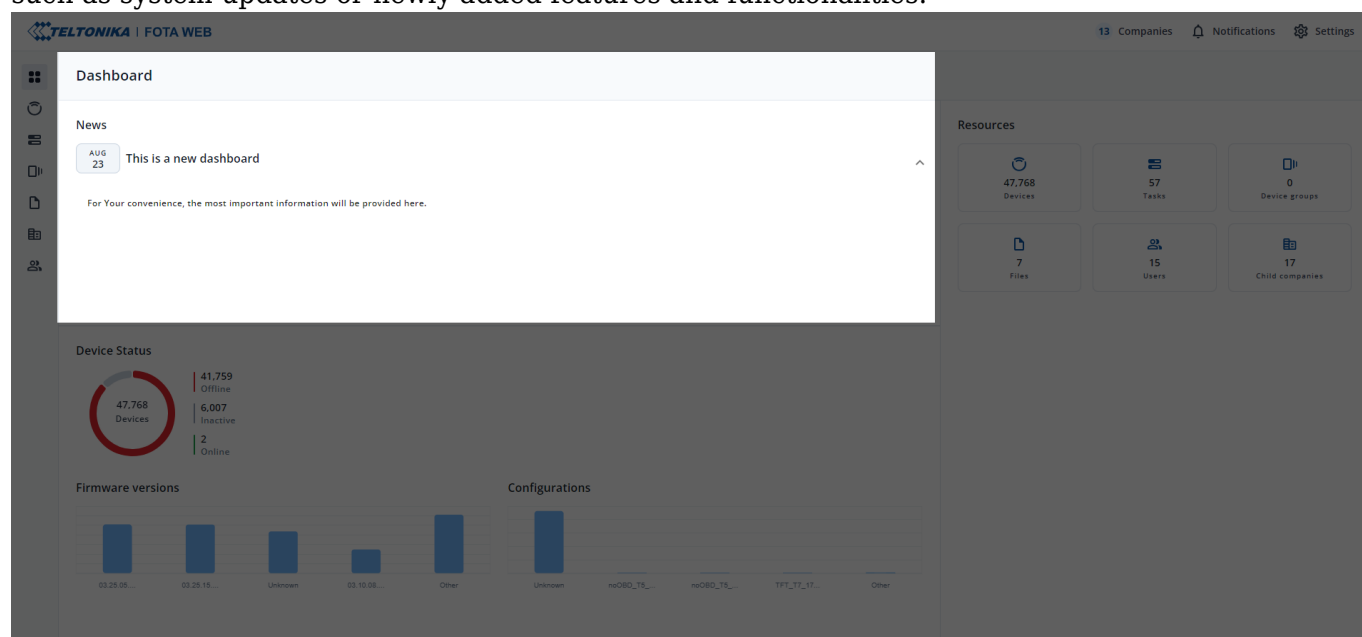

Devices status

Device Status window will provide information to the user on how many devices are **Online** , **Offline** or **Inactive**:

- **Online** - Device successfully connected at least once in the past 24 hours.
- **Offline** - Devices didn't connect to FOTA Web in the past 24 hours.
- **Inactive** - Device never connected to the FOTA Web.
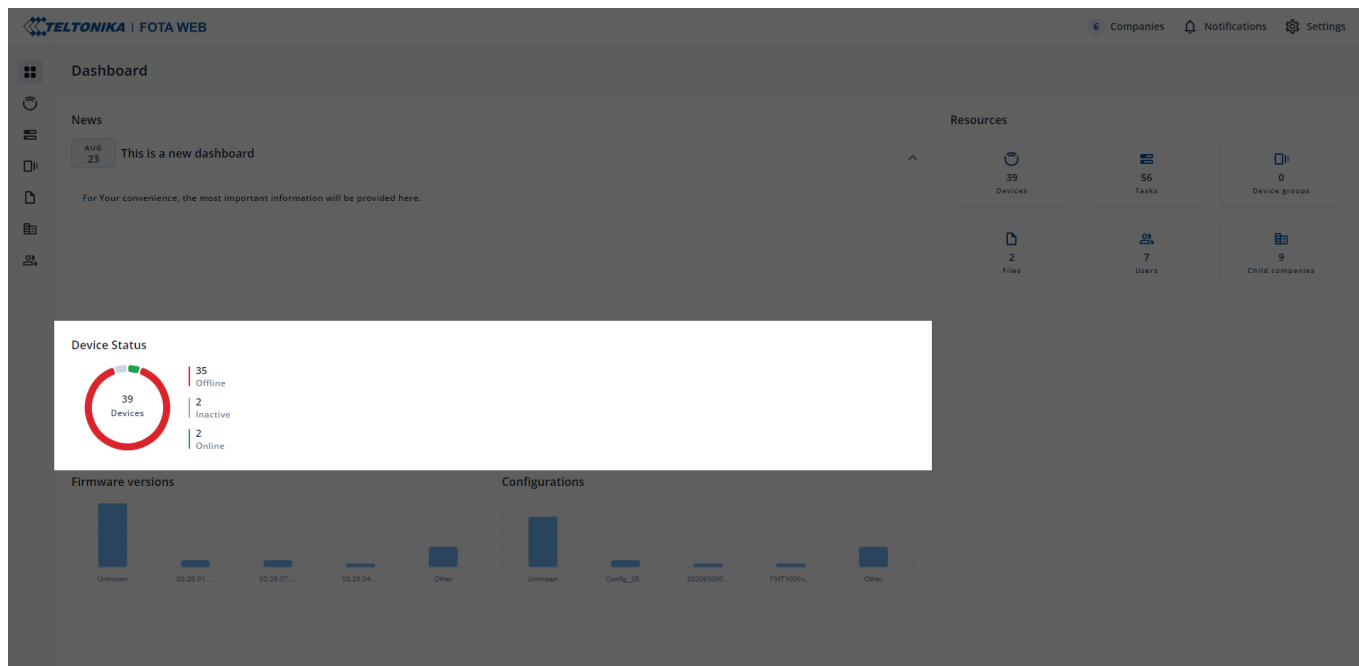

Firmware version and configurations

Firmware versions and configuration statistic window will mainly show how many devices are on a specific firmware version or has a specific configuration. This information helps you to distinguish if there are any devices with old firmware or with outdated configurations.

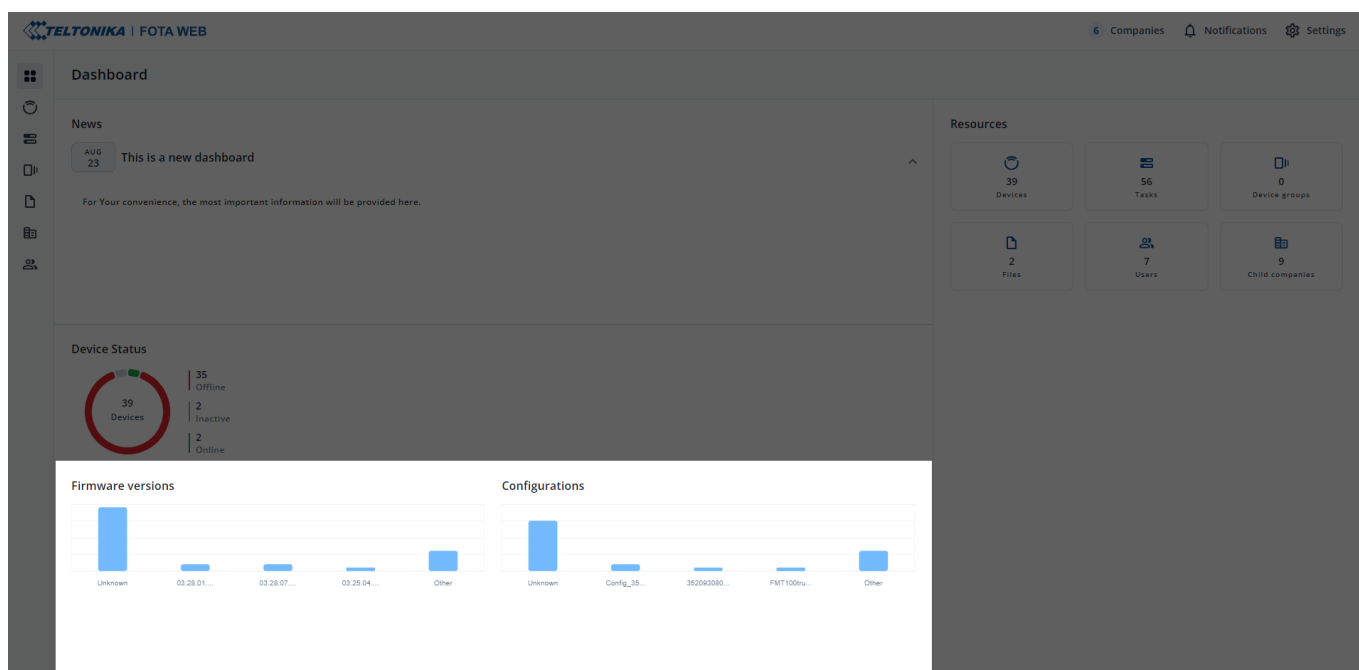

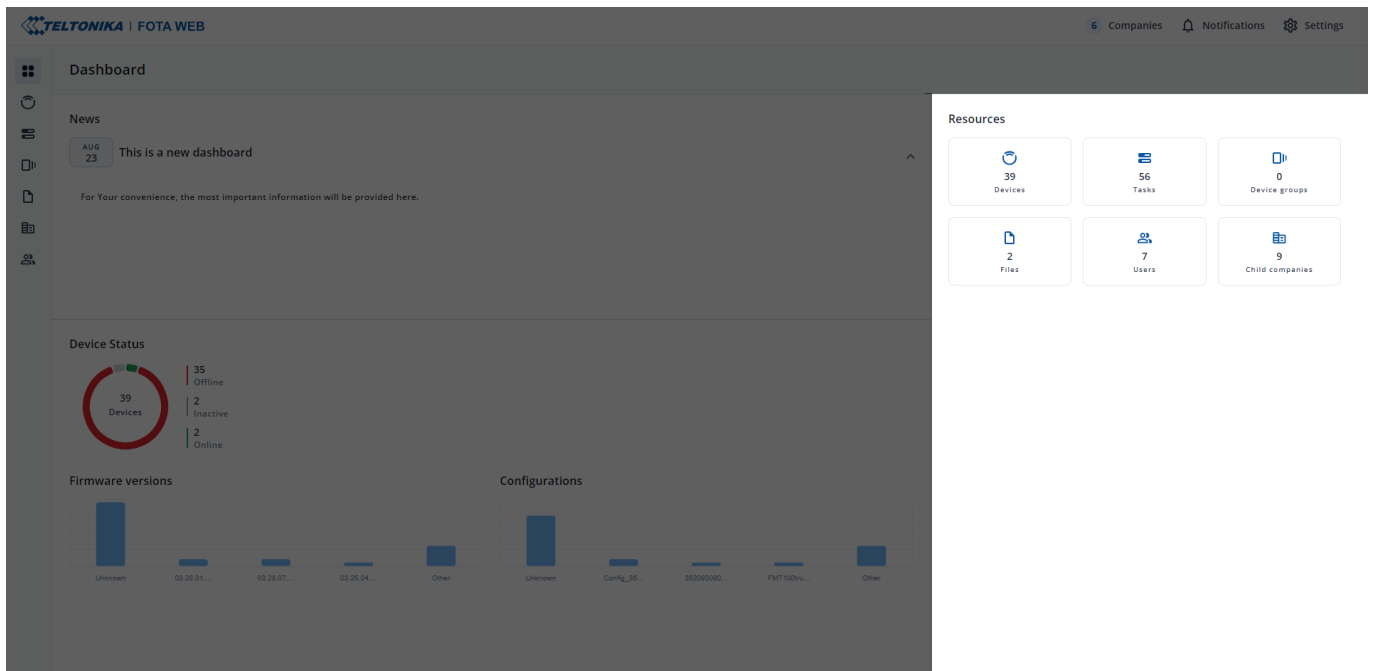

Resources

Resources window will provide information on how many total items you have such as:

- Devices - Total number of devices you have.
- Tasks - Total number of tasks that have been created, completed, failed or expired.
- Device groups - Total number of groups.
- Files - Total number of files that have been uploaded or downloaded.
- Users - Total number of users that are assigned to your company

- Child companies - Total number of child companies that are under the main company.
