GPS-server with Fleet Management (FM)

❌

GPS-server.net is compatible with all of Teltonika's Fleet Management (FM) devices.

☐

Contents

Description

GPS-server.net is a developer of advanced GPS tracking software since 2011. The company offers global solutions suitable for business and personal use as well as professional white-label software services. In addition to that Company offers Teltonika GPS Fleet Management (FM) devices. Customer service is available 24/7.

It is worth mentioning that GPS tracking software offers real-time location tracking and sensor monitoring using widgets, history and reports management, notifications about important events, remote device control, image and video support, custom billing, Android and iOS mobile phone tracking applications, multilingual interface, API access and many more. GPS-server.net is designed to communicate with a wide variety of GPS devices, so you have the flexibility to use any hardware you choose. Software developers ensure regular software updates containing new features, improvements and bug fix six to eight times a year.

For less demanding customers Company offers free GPS tracking services under https://www.gps-server.com domain since the 2014 year.

Supported devices

GPS-server.net supports all the main Teltonika Telematics tracking devices. For any specific queries, please address the service provider directly or refer to the following link: https://www.gps-server.net/supported-devices
