## FLEET TELEMATICS PLATFORM

We are excited and honoured to unveil our groundbreaking Fleet Telematics platform (aka FT platform), which sets new standards for GPS trackers in the telematics industry. As an evolution of our FMB platform, the new one brings unparalleled performance to each FT platform device, greater capabilities, and competitiveness for our customers and business partners.

A platform - the embedded operating system - is the core element in the development of Teltonika GPS trackers. This is our 5th generation to date. After T-BOX, FM, FMA, and FMB, here comes the game-changing FT.

### 4x

Efficiency redefined: Experience longer performance with slower drain thanks to a more than 4 times reduction in power consumption in Ultra Deep Sleep mode.\*

### 2x

Breaking barriers: Increasing the average number of satellites in use by up to 2 times (41 vs. 18 compared with the FMB platform). The parameter was tested with devices mounted in a car on a 100 km route with 40% in Vilnius city and 60% outside the city.\*

### 1.4x

Unmatched accuracy: Benefit from 1.4 times higher GNSS positioning accuracy, so you are always in the know.\*

### IP69K

Ultimate durability: With an IP69K-rated waterproof casing, customers can count on robust protection even in the harshest environments (available only on selected models).

\*The results presented are based on the thorough testing carried out by Teltonika Telematics R&D team.

Find all use cases

## FLEET TELEMATICS

Merging the best of telecommunications and informatics, telematics offers unique ways to monitor a vehicle. From motorbikes to heavy trucks and lorries, from a single passenger car to huge fleets – there is a solution for each and every client. Telematics is the key to effective resource management, optimisation of costs, and safety across a range of industries.

## LOGISTICS & DELIVERY SERVICES

Modern-day logistics require a considerable amount of information for business optimisation. It is not enough just to get the GPS coordinates of your vehicle's current location. With fuel consumption, driven distance, and many other parameters at hand, you will manage your fleet resources effectively. No expenses will be left unaccounted for. Monitoring driver activities will allow you to be in control of your staff, while temperature data will make you sure that goods are delivered of high quality.

## E-MOBILITY MANAGEMENT

The trackers that have accurate location reporting, remote lock/unlock features, battery level and status, data, etc. From sharing services and fleet management to anti-theft and cargo delivery applications, these devices are ideally suited for e-scooters, e-bikes, e-forklifts, and other smart e-vehicles.

## UTILITY & EMERGENCY TRANSPORT

The safety and life quality of our society highly depend on the ability to manage the transport of utility and emergency services properly. Owing to our solutions, operators will always know the current location and status of any vehicles, including maintenance machinery, ambulances, police fleets, etc. With the help of modern tracking technology, timely responses to unforeseen situations and efficient routine operations can be effectively ensured.

## CAR SHARING, RENTAL & LEASING

Knowing vehicle's current location, status, and track history is crucial for all car sharing and rental service providers. Gain full control of your fleet with our solutions – prevent theft with remote car lock management, receive notifications of possible contract violations, and monitor driver behaviour and areas where the vehicles are driven.

## AGRICULTURE, CONSTRUCTION & MINING

With our innovative telematics solutions, you will have full control over the agricultural machinery by knowing its current position, driver activities, and other vital information. Similarly, managing construction and mining machinery is a complex task that can lead to huge expenditures if done improperly. The benefits of using our GPS tracking devices include protecting your equipment from theft, reducing fuel expenses, and enhancing safety.

## DRIVER SAFETY

In the dynamic landscape of vehicle telematics, ensuring driver safety is paramount. It underlines our commitment to making journeys safer, smarter, and more efficient. Harnessing the power of telematics, Teltonika GPS trackers and accessories help monitor driver behaviour, predict potential hazards, and ultimately protect the most valuable asset of all – people.

## ASSETS & WORKFORCE

There are countless fleet assets and items around the world that are difficult to track and locate manually. Asset GPS trackers are designed to effectively monitor such items and provide additional protection against theft. Even more, Teltonika autonomous workforce tracking devices ensure the personal safety of vulnerable people and those who carry out activities without close supervision by others, such as healthcare, maintenance, social, and lone workers.
