Output power listed is ERP for frequencies below 1 GHz and EIRP for frequencies above 1 GHz. SAR compliance for body-worn operating configurations is limited to the specific configurations tested for this filing. Body-worn operations are restricted to belt-clips, holsters or similar accessories that have no metallic component in the assembly and must provide at least 10mm separation between the device and the user's body. End-users must be informed of the body-worn operating requirements for satisfying RF exposure compliance. The highest reported SAR for body-worn, limbs accessory and simultaneous transmission use conditions are 1.18 W/kg, 1.59W/kg and 1.67 W/kg respectively.
