# FMB208 General description

Main Page > Advanced Trackers > FMB208 > FMB208 Manual > FMB208 General description

FMB208 is a tracking terminal with GNSS and GSM connectivity, which is able to collect device coordinates and transfer them via GSM network to a server. This device is perfectly suitable for applications, which require the location acquirement of remote objects.

#### **Contents**

- 1 Package contents
- 2 Basic characteristics
- 3 Technical features
- 4 Technical information about internal battery
- 5 Electrical characteristics

### Package contents

The FMB208 device is supplied to the customer in a cardboard box containing all the equipment that is necessary for operation. The package contains:

- FMB208 device with case and wires;
- USB cable (optional);
- Integrated Li-ion battery 3.75V, 800mAh for FMB208 device;

### **Basic characteristics**

GSM / GPRS / GNSS features:

- Teltonika <u>TM2500</u> quad band module (GSM 850 / 900 / 1800 / 1900 MHz);
- GPRS Multi-Slot class 12 (Up to 85,6 kbps);
- SMS (text, data);
- Integrated GNSS receiver;
- Up to -162 dBm GNSS receiver sensitivity.
- GNSS Module Quectel L89;

#### Hardware features:

- 128 MB internal Flash memory (422 400 Records);
- Built-in movement sensor;
- Integrated Li-ion battery 3.75V, 800mAh for FMB208 device;
- Internal High Gain GSM antenna;
- Internal High Gain GNSS antenna;

#### The Interface features:

- Power supply: 10 ... 30V;
- USB port;
- 2 digital inputs;
- 2 Analog/Digital inputs;
- 2 open collector digital outputs (connecting external relays, LED's, buzzers, Panic buttons, etc.);
- RS232 connection
- 2 LED's indicating device status.

#### Special features:

- High Quality track even in high density urban canyon;
- Ready for harsh environment;
- Any element event triggers (external sensor, input, speed, temperature, etc.);
- Highly configurable data acquisition and sending;
- Multiple Geo-fence areas;
- Sleep mode;
- Deep sleep mode;
- Configurable scenarios available;
- Real-time process monitoring;
- Authorized number list for remote access;
- Firmware update over GPRS or USB port;
- Configuration update over GPRS, SMS or USB port;
- TCP/IP or UDP/IP protocol support;
- >500000 record storing;
- Overvoltage protection.

| Description                           | Voltage  | Duration  |
|---------------------------------------|----------|-----------|
| Normal operation                      | +10 30 V | Unlimited |
| Protection turns on, device turns off | 34 V     | Unlimited |
| Maximum voltage                       | < 70 V   | Unlimited |
| Maximum voltage impulse               | 120 V    | 10 ms     |

### **Technical features**

| Part name             | Physical specification |
|-----------------------|------------------------|
| Navigation indication | LED                    |
| Modem indication      | LED                    |
| USB                   | Mini USB socket        |
| GNSS                  | Internal GNSS antenna  |

#### **Technical details**

GPRS: average 40.1 mA

Nominal: average 53.89

mA;

Power supply 10 ... 30V DC 1.5 W max. device consumption Energy consumption at 12 V:

GPS Sleep: average 8.78

Online Sleep: average 6.91

mA;

Deep Sleep: average 6.59

mA;

Ultra Sleep: average 5.61

mA

FMB20X Battery charge current

max. 207 mA

Operating temperature (without battery) -40..+85 °C

Storage temperature (without battery)

-40..+85 °C

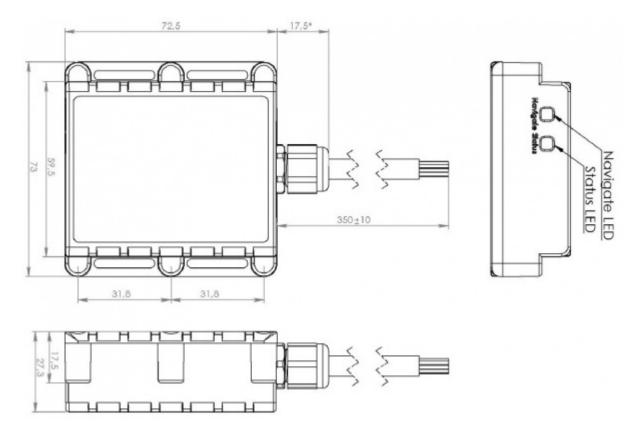

Storage relative humidity

5..95% (no condensation)

Device + case + battery weight

With 400 mAh bat. - 170 g With 1800 mAh bat. - 210 g

#### Dimension drawing:

## Technical information about internal battery

| Internal back-up<br>battery    | Battery<br>voltage (V) | Nominal capacity (mAh) | Power<br>(Wh) | Charging<br>temperature<br>(°C) |
|--------------------------------|------------------------|------------------------|---------------|---------------------------------|
| Li-ion rechargeable<br>battery | 3.75∏3.90              | 800                    | 2.96          | 0 - 50                          |

Batteries are covered by 6 month warranty support.

 $\stackrel{\textstyle \searrow}{}$  CAUTION: RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

Battery should not be disposed of into general household waste.

Bring damaged or worn-out batteries to your local recycling center or dispose them into a battery recycle bin commonly found in supermarkets.

### **Electrical characteristics**

| Characteristic description  | Value |       |      |                        |
|---|-------|-------|------|------------------------|
|   | Min.  | Typ.  | Max. | Unit                   |
| Supply Voltage:   |       |       |      |                        |
| Supply Voltage<br>(Recommended Operating Conditions)                      | 10    |       | 30   | V                      |
| Digital Output (Open Drain grade):  |       |       |      |                        |
| Drain current (Digital Output OFF)  |       |       | 120  | μΑ                     |
| Drain current<br>(Digital Output ON, Recommended Operating<br>Conditions) | 0.1   |       | 0.5  | A                      |
| Static Drain-Source resistance (Digital Output ON)                        |       |       | 120  | $m\Omega$              |
| Digital Input:  |       |       |      |                        |
| Input resistance (DIN1)   |       | 59.9  |      | $k\Omega$              |
| Input resistance (DIN2, DIN3)   |       | 67.5  |      | $k\Omega$              |
| Input voltage<br>(Recommended Operating Conditions)                       | 0     |       | 60   | V                      |
| Input Voltage threshold (DIN1)  | 7.5   | 7.7   | 8    | V                      |
| Input Voltage threshold (DIN2, DIN3)                                      | 2.5   | 2.7   | 3    | V                      |
| Analog Input:   |       |       |      |                        |
| Input voltage (Recommended Operating Conditions), Range 1                 | 0     |       | 10   | V                      |
| Input resistance, Range 1   |       | 120   |      | $k\Omega$              |
| Input voltage (Recommended Operating Conditions), Range 2                 | 0     |       | 30   | V                      |
| Input resistance, Range 2   |       | 146.7 |      | $k\Omega$              |
| Output inner resistance   | 450   |       | 600  | $\boldsymbol{m}\Omega$ |
| Output current ( $U_{out} > 3.0 \text{ V}$ )                              |       |       | 75   | mA                     |
| Short circuit current ( $U_{out} = 0$ )                                   |       |       | 75   | mA                     |

**▼** Analog Input error margin can increase if temperature varies.
