FMB go2sleep

This command instantly puts device to sleep ignoring going to sleep condition and stays asleep for the set time.

SMS format: `go2sleep:#`
'#' – time in minutes

Response example: `Device will wake up after -> Hours:2 Minutes:25`

Sleep mode which the device goes to depends on the device:

- **FMB965** and **FMB930** devices - **Power Off sleep**.
- All other FMB devices - **Ultra sleep**.

Note !

- **When putting a device to sleep via this SMS/GPRS command, accelerometer gets turned off as a wake up source, so device won't wake up from ultra or power off sleep due to movement.**
