

FM Configurator

[Main Page](#) > [EOL Products](#) > **FM Configurator**

Teltonika FM Configurator provides the necessary tools to manage FM devices. Simple, work-oriented GUI allows the user to navigate quickly through the menus of the configurator and makes the configuration process accessible to everyone. Upon launching the configurator software the user will meet a standard and basic configuration. Highly configuration options can be accessed by clicking "Advanced Configuration". After the configuration is done it can be saved and uploaded to appropriate devices.
