FOTA WEB Companies

The companies tab is used to manage any additional child companies to your parent company.

☐

Contents

Companies section

There are the following columns in the general **Companies** area.

Companies (2,916)				Create	Merge
🔍 Search				‹ 1 ›	▦ Table view
☐	Name	Parent company	Created at		
☐	EUROPE	Teltonika	2021-04-07 09:05:35		✎

FIELD NAME	**VALUE**	**DESCRIPTION**

ID	Company's ID	Company ID generated by FOTA Web when it was first created	
	NAME	Company name	Field displays company's name
CODE	Company Code| default: -	Field displays company's code that is generated when devices are first dispatched.	
PARENT COMPANY	Parent company name	Field displays parent company name that is above the user company in the hierarchy tree	
CREATED BY	User email	Field displays user's email that have created the company	
CREATED AT	Creation date	Field displays the date when company was created	

Create

The **Create** pop up button is the main tool for creating a company.

These are the steps to create a child company for your user company:

1. Click on **Create**.
2. Enter the name of the parent company in the first field.
3. Enter the name of the child company in the second field.
4. Click on **Create**.

NOTE: You can only create a child company as a parent company user. Any company that is created under the parent company can be managed by users within it and within the parent company. The users in the child company do not have access to management of the parent company.

Companies hierarchies depth

The maximum vertical depth of company hierarchies is limited to 5 levels where the first level is the parent company and 4 levels of child companies. One company can have multiple horizontal companies.

Transfer companies

This function allows the user to move or merge companies existing within his hierarchy

Move

The **Move** pop up button is used for moving existing child companies. These are the steps to move companie:

1. **Move** selected by default.
2. Enter the name of the source company in the first field.
3. Enter the name of the target company in the second field.
4. Click on **Move**.
5. Click on **Next**.
6. Make sure you have correctly selected source and target companies.
7. Click on **Move**.

Merge

The **Merge** pop up button is used for merging existing child and/or parent companies. These are the steps to merge two companies into one:

1. Click on **Merge**.
2. Enter the name of the source company in the first field.
3. Enter the name of the target company in the second field.
4. Click on **Merge**.
5. Click on **Next**.
6. Make sure you have correctly selected source and target companies.
7. Click on **Merge**.

NOTE: Source company will be deleted after merging and all source company's users, devices, files and groups will be moved to the target company.

Company „Merge" functionality changes – **after 2024.05.06.** Currently, the system performs two separate actions in the background when merging two companies:

1.   Moving „Source" company under „Target" company.

2.   Merging „Source" company with „Target" company.

We want to streamline „Move" and „Merge" functionalities in FOTA WEB to perform the intended action. After changes are introduced, „Merge" action will be allowed only when **the source company is the immediate parent of the target company**. For example, in a company structure like this:

- Company A - Parent company.
    - Company B - Child of Company A.
        - Company D - Child of Company B.
    - Company C - Child of Company A.

"Company B" and "Company C" can be merged with "Company A". And "Company D" can be merged

with "Company B". Graphical representation:

Delete

The **Delete** pop up button is used for deleting existing child companies.

These are the steps to delete two companies:

1. Check companies that you would like to delete.
2. Click on **Delete**.
3. Make sure you have selected the correct companies.
4. Click on **Delete**.

NOTE: Deleted companies cannot be restored.
