

How to Install FMC650 on DAF XF

[Main Page](#) > [Professional Trackers](#) > [FMC650](#) > [FMC650 Manual](#) > **How to Install FMC650 on DAF XF**

Installation process

- Below is shown main installation location:

- Carefully unscrew the fuse panel screws and fold the panel down.

- Where to find main connector?

- Connect the wires accordingly. It is recommended to use DIN 1 instead of DIN 3 for ignition detection.

- After installation and device configuration of FMC650 (CAN1 should be selected - FMS/TACHO), you can check if installation is properly made. Turn on ignition of vehicle and send SMS command: "tachocheck". If response shows: "Can1:111,F2EF", 111 -means tachograph properly connected, F2EF - or any other value which is not equal to 0000, means FMS data received also.
