

LocTracker with Fleet Management (FM)

[Main Page](#) > [General Information](#) > [Fleet Management platforms](#) > **LocTracker with Fleet Management (FM)**

LocTracker is compatible with a range of Teltonika Telematics fleet management (FM) devices.

Description

LocTracker continuously enhances business efficiency for the most intelligent transportation and logistics companies. More than 2,500 clients with a total of 60,000 vehicles served trust the best market practices in fleet management.

The main LocTracker advantages are route optimization and exact routing. The software's unique feature is a possibility to plan an exact route for trucks with the toll cost calculation, parking places, real time driving data from tacho and to provide an exact route to a driver. It is ensured that the route will be opened in the driver's navigation 100% the same as planned.

Also, LocTracker provides precise fuel control eliminating the inaccuracy of onboard computer fuel consumption reports. Economical driving reports as well as remote tachograph and driver card reading are available too.

LocTracker has a wide range of features developed ahead of the market, accessible to every user, and consistently updated free of charge. By collaborating with the best data providers and technology partners, the solution is integrated seamlessly with other systems that are common in logistics world.

Supported devices

LocTracker supports all the main Teltonika Telematics tracking devices. For any specific queries, please address the service provider directly.
