Description

RentalMatics is a technology platform, designed to boost revenues, cut costs and maximise profits for vehicle rental and car sharing companies globally. The company's solution is built specifically for vehicle rental companies and their unique challenges.

The platform is designed to scale and evolve, leveraging advanced tools such as AI, from cloud partners Google Cloud, Google AI and Teltonika.

RentalMatics technology is trusted to increase utilisation and grow revenues by the operational teams of market leading brands, such as Hertz, Dollar, Thrifty, Europcar and Green Motion. The company has secured multiple US and European patents and has partnered with the European Space Agency to enhance telematics capabilities, such as satellite positioning.

Features

RentalMatics' technology offers numerous benefits by integrating data from multiple sources and converting it into actionable insights. This capability simplifies complex data, allowing fleet owners to better understand and manage the information generated by their operations.

- **Maximised revenue:** Real-time intelligence that optimises fleet utilisation and maximises revenue.
- **Inventory optimisation:** Live mapping of full fleet, 24/7. All vehicles in the right place at the right time.
- **Advanced fleet management:** Proactive management, maintenance and servicing of the entire fleet operation.
- **Increased security:** Minimises risk, identifies fraud, safeguards fleet and protects fleet investment.
- **Exceptional customer experiences:** Empowers teams with accurate, live data to proactively address issues.
- **Faster issue resolution:** Resolves damage disputes quickly, minimises lengthy claims and

disruptions.

- API integration: Unlocks full revenue potential with a two-way API integration to the world's leading car rental systems.
- AI Ops ready: An ever-evolving platform positioned to capitalise on the growing potential of AI in fleet management.

Supported devices

RentalMatics supports all of the main Teltonika's telematics tracking devices. For any specific queries, please address the service provider directly or refer to the following link:
