TacoSync Getting started

[TachoSync](#) > **TacoSync Getting started**

☐
Contents

Here you will find all needed information so you could easily start using TachoSync platform.

CCA requirements

OS	Windows 10; Windows 11
CPU:	Intel or AMD processor with 64-bit support
Disk Storage:	500 MB of free disk space
Internet:	An Internet connection is required for CCA connection to Tacho Sync
How to download:	You can download the CCA application once logged in to Tacho Sync (by navigating to Settings >> Download Company Card Authenticator).

Network requirements

If your SIM cards are within Mobile Operator's VPN (private APN), the following must be ensured and paid special attention.
1. Must ensure that domain **https://tacho.teltonika.lt/** can be resolved from within Operator's network.
2. Following IP and ports (egress) must be allowed by the operator.

When using VPN SIM cards, you should still configure **https://tacho.teltonika.lt/** domain in your configurator, not the plain IP address.

FM Device requirements

Supported models	FMB640, FMC640, FMM640, FMB641, FMC650, FMM650.
Minimal Firmware version	01.02.11 or later, works with every firmware
Device configuration	• Domain: tacho.teltonika.lt • Port: 29000
