

# Template:FMM640 Sleep settings

## Sleep settings

User can choose sleep mode. FMM640 has 3 different sleep modes:

1. GPS Sleep mode - When in GPS sleep mode, FMM640 turns GPS module off and continues making new periodic records.
2. Deep Sleep mode - While in deep sleep mode, FMM640 sets the GNSS receiver to sleep mode and turns off GSM/GPRS module.
3. Online Deep Sleep mode - In this mode the device works as in deep sleep mode, but without deregistering from GSM network.
