Test Dual Cam wiki

Teltonika DualCam solution is perfect for capturing videos or pictures of the events that might occur on the road, e.g. crash. Mounted on the vehicle front window, two cameras are used, front and rear, to record videos before and after the events, take photos periodically or by request and send all data to the server.

DualCam is connected to **FMB125,FMC125 and FMB225, FMC225** devices using the RS232 interface.
