

WEB Tacho Email notifications

Email notifications

In "**User Settings**" you can enable "**Failed schedule notification**" and "**Receive files**" options.

If "Failed schedule notification" option is enabled - you will receive e-mail messages for failed schedules.

If "Receive files" option is enabled - you will receive e-mail messages with DDD files attached on schedule completion.

If there is more than one user, these settings are configured for each user **seperate**.
