Below is shown all status designations of **Status** column:

Display Tacho Error Codes

Display Tacho Error Codes functionality basically lets you see the Error description that occurred at a specific time. It is useful, because you can identify the exact issues that happened at that time, take actions to it. Also this feature is necessary if you are creating a HelpDesk ticket about the error code. So please provide a screenshot of the error code with the explanation in the ticket.

- To check the error code description, hover your mouse over Error symbol:

- Example of error code:

- This error messages could be copied to the clipboard by pressing on “X” Icon of the error for providing the information in system. Example of clipboard message.
