

# ADAS test time

## ADAS data transferring timing

Image resolution	Image compression (%)	Video duration (s)	Size of image Image	Size of video F30C640 4G / F30B640 2G	Time interval (s) from trigger to files received on server F30C640 4G / F30B640 2G	Photo example
640x480	30	-	~24kB	-	72s / 100s	
1280x720	30	-	~160kB	-	180s / 230s	
640x480	-	5s	Video	~588kB	75s / 110s	
640x480	-	10s	-	~1MB	201s / 290s	
640x480	-	15s	-	~1.5MB	220s / 310s	
1280x720	-	5s	-	~875kB	221s / 310s	
1280x720	-	10s	-	~1.64MB	309s / 410s	
1280x720	-	15s	-	~2.52MB	450s / 600s

- \* **NOTE:** This approximate time which we receive during testing in real cases can be different.
- \* **NOTE** Image compression is a type of data compression applied to digital images, to reduce their cost for storage or transmission. Algorithms may take advantage of visual perception and the statistical properties of image data to provide superior results compared with generic data compression methods which are used for other digital data.
