

DSM

[Main Page](#) > [Video Solutions](#) > **DSM**

DSM (Driver Safety and Monitoring solution). This product with Deep-Learning technology can support drowsiness, distraction and yawning attention warnings as well as periodic event data and picture footage transfer.

We would like to introduce our new solution, allowing the possibility to connect two cameras, DSM and DashCam or DualCam, to one device, FMC650. By utilizing the two RS232 ports on the FMC650, you can connect the DSM camera for driver status monitoring to one port and the DualCam or DashCam camera for road and cargo monitoring to the second port.
