Installation instructions

FMB2YX is the device that has internal GNSS and GSM antenna.

Internal GNSS antenna device should be mounted with the sticker view to the open sky (metal free) with not less than $\frac{3}{4}$ of metal free area as shown in figure below.

FMB2YX has IP67 protection class. Top performance is reached if mounted outside of the vehicle. The device has 4 mounting holes on the edges, and can be tightened with screws, adhesive tape or plastic straps.

FMB2YX area with sticker and GNSS antenna is shown in figure below.
