# Timestamp parsing

## Timestamp parsing

The value is received as 4 byte hexadecimal value. Example how to parse it to a human readable date is provided in the table below:

| Step | Timestamp | Format |
|---|---|---|
| 1. Received value | 63-36-86-D0 | HEX |
| 2. Converted to DEC | 1664517840 | DEC |
| 3. Converted to Human readable date | Friday, September 30, 2022 06:04:00 AM, GMT+00:00 | Human readable date |

Converting whole 4 byte Hexadecimal - 63-36-86-D0 value to decimal value as it is equivalent of Unix timestamp in seconds - 1664517840. Convert epoch to human-readable date: https://www.epochconverter.com/
