Users

☐

Contents

This chapter is an overview of **USERS** menu.

Users section

This section provides information about existing users within your **Company**.

Below you shall find an explanation of what each column means.

FIELD NAME	VALUE	DESCRIPTION
EMAIL	String: email	This is the email that has been used for User invitation. **NOTE:** you can not have more than one User bound to the same email address.
ROLE	Integrator | User	User's role determines what privileges this user has. For role differences please refer to **USER ROLES**.
COMPANY	String: Company name	User can belong to the **root** level company or a **child** company. **Root** level company can have only **Integrator** roles. **Child** level company can have only **User** roles. For Company and User hierarchy refer to **USER ROLES**.
CREATED AT	String: date	This is the date that a User accepted invitation thus creating an account.

Filter

Filter gives options to select Users by a combination of their Roles and Companies.

You can select/filter devices by: - Role
- Company

- Device Model
- Firmware version
- Job status

Under **Active Filters** section you shall see current filters that have been selected.

Each of the **Active Filters** can be removed individually by clicking on a particular filter, or they all can be removed together by clicking **Reset all**.

Active Filters shall maintain current configuration until manually Reset, meaning that navigating through various FOTA WEB menu's **Active Filters** shall remain as last configured.

You can also toggle a different view with **Resource** section.

FIELD NAME	VALUE	DESCRIPTION
Resource	Signed up | Invited; default: Signed up	This section allows management of invitations. - Signed up – shows activated Users. - Invited – shows Users that have yet to activate their accounts via an email. **NOTE:** Invited yet inactive Users are **NOT** deleted automatically.

Actions

ACTION button provides control of existing and future Users.

FIELD NAME	ACTION	DESCRIPTION
Invite new user	Email | Company	User invitation has two requirements: - an Email (must be unique within FOTA WEB, it is not possible to use same Email for few users) - Company that this user should be assigned to If selected company is a **root** level company – new User shall be with an **Integrator** role. If selected company is a **child** company – new User shall be with a **User** role. At the time of new User invitation, you shall receive a short explanation stating: - Whether your selected company is **root** or **child** company - Whether User will have **Integrator** or **User** role

Remove	Remove User	You can remove (delete) Users that have been created within **root** or **child** level companies. Before removing a User, a YES|CANCEL prompt shall be given. You can not remove User that you are currently logged in with. **NOTE**: if a User is removed it's email is no longer occupied.
