

Why does TAT100 not send data?

[Main Page](#) > [Autonomous Trackers](#) > [TAT100](#) > [TAT100 FAQ](#) > **Why does TAT100 not send data?**

1. Make sure Tracking settings are configured correctly, according to these [instructions](#)
2. Check if your **APN** , **Domain** and **Port** entered correctly and GPRS data is **Enabled**.

3. In some rare cases it helps to clear the device's memory:

It could be done remotely using SMS/GPRS command *sdformat*.
More info about the commands [here](#).

4. Make sure the device is turned **ON**.

NOTE! Please do not change Open Link Timeout in TAT100 configuration

- ✗ GPRS -> Record Settings -> Open Link Timeout -> Should be set to [30] / Response Timeout -> Should be set to [30] / Network Ping Timeout -> Should be set to [0]
- ✗ NOTE! Scheduler days has to be selected to enable data sending. More info [here](#).
